

Appendix: Summary of the Burials Recovered from Hacimusalar Höyük

The following list of burials provides an overview of the graves that were analyzed by the author during the 2011–2013 seasons. Most of the burials studied were excavated between 2009–2013, but material is also included from the 1993 survey, 2007 cleaning and 1994–2005 excavation seasons. Each entry represents a single burial and contains a summary of osteological and burial data. The entries are organized by context (e.g., Central Church, West Church, etc.) and labeled by their registry number (also called the ‘HM Number’).

Note that twelve burials have ‘Burial Numbers’ in addition to their registry numbers. These graves were excavated sometime between 1999 and 2002 and assigned ‘Burial Numbers’ by Jeannette Rundquist, who served as the excavation’s osteologist at that time. The human remains from graves with ‘Burial Numbers’ that were marked ‘unanalyzed’ by Rundquist were studied in 2013 and are included in this analysis.

All osteological data presented below (minimum number of individuals, completeness, preservation, age, sex, stature, pathologies and anomalies, cranial nonmetric traits, animal bone) derive from non-destructive macroscopic analyses performed by the author in accordance with the protocol outlined by the British Association for Biological Anthropology and Osteoarchaeology (BABAO) (Brickley and McKinley 2004). Burial data (body position, grave orientation, burial receptacle, grave goods) were obtained from excavation journals and records.

OP: B4g8–9 Locus: 29 Lot: Cleaning

Minimum Number of Individuals: 1; Completeness: 1–25%; Preservation: Grade 2; Age: Juvenile (5–6 years); Sex: Indeterminate; Stature: Indeterminate; Pathologies and Anomalies: None; Nonmetric Traits: None; Animal Bone: None; Body Position: Unknown; Grave Orientation: Unknown; Burial Receptacle: Unknown; Grave Goods: Unknown

South Rim

25507

OP: F5j4 Locus: 2 Lot: 2

Minimum Number of Individuals: 2; Completeness: 25–50%/1–25%; Preservation: Grade 1; Age: Juvenile (3–12 years)/Adult (> 20 years); Sex: Both indeterminate; Stature: Both indeterminate; Pathologies and Anomalies: Healed avulsion fracture/None; Nonmetric Traits: Metopic suture/None; Animal Bone: 11 fragments; Body Position: Supine/Unknown; Grave Orientation: W–E; Burial Receptacle: Cist grave; Grave Goods: 2 glass bracelets (right wrist), 1 bronze bracelet (left wrist)

25538

OP: F5h4 Locus: 8 Lot: 6

Minimum Number of Individuals: 1; Completeness: 1–25%; Preservation: Grade 1; Age: Juvenile (3–12 years); Sex: Indeterminate; Stature: Indeterminate; Pathologies and Anomalies: None; Nonmetric Traits: None; Animal Bone: None; Body Position: Supine; Grave Orientation: W–E; Burial Receptacle: Cist grave; Grave Goods: None

25843

OP: F5h4 Locus: 8 Lot: 7

Minimum Number of Individuals: 1; Completeness: 50–75%; Preservation: Grade 3; Age: Young Adult (20–35 years); Sex: Female; Stature: 160–166 cm; Pathologies and Anomalies: Dental calculus; Nonmetric Traits: Bridging of the supraorbital notch (left); Animal Bone: 10 fragments; Body Position: Supine; Grave Orientation: W–E; Burial Receptacle: None; Grave Goods: None

25850

OP: F5h4 Locus: 9 Lot: 9

Minimum Number of Individuals: 1; Completeness: 50–75%; Preservation: Grade 2; Age: Middle Adult (35–50 years); Sex: Male; Stature: 165–170 cm; Pathologies and Anomalies: Degenerative joint disease, linear enamel hypoplasia, antemortem tooth loss, periodontal disease; Nonmetric Traits: Ossicles in lambdoid (7 left, 8 right), parietal foramen (left); Animal Bone: 5 fragments; Body Position: Supine; Grave Orientation: W–E; Burial Receptacle: Cist grave; Grave Goods: None

26226

OP: F5h4 Locus: 6 Lot: 13

Minimum Number of Individuals: 1; Completeness: 50–75%; Preservation: Grade 4; Age: Adolescent (14–20 years); Sex: Probable Female; Stature: ~169 cm; Pathologies and Anomalies: Dental caries, dental calculus, linear enamel hypoplasia, cribra orbitalia; Nonmetric Traits: Ossicles in lambdoid (2 left), bridging of the supraorbital notch (right); Animal Bone: 10 fragments; Body Position: Supine; Grave Orientation: Unknown; Burial Receptacle: Cist grave; Grave Goods: None

26229

OP: F5h4 Locus: 14 Lot: 14

Minimum Number of Individuals: 1; Completeness: 1–25%; Preservation: Grade 1; Age: Adult (> 20 years); Sex: Indeterminate; Stature: 173–177 cm; Pathologies and Anomalies: Periostitis; Nonmetric Traits: None; Animal Bone: 4 fragments; Body Position: Supine; Grave Orientation: Unknown; Burial Receptacle: None; Grave Goods: None
