

# E-journal Publishing @ Pitt

Vanessa Gabler, Electronic Publications Manager

## Did you know that the ULS is a leader in Open Access Publishing?

We work with editorial teams at Pitt and around the world.

The ULS is on the leading edge of technology innovation in publishing with services like

- Measuring research impact through alternative metrics
- Depositing research data to accompany research articles
- Integrating with researcher identifier systems like ORCID

We can help you achieve your publishing goals.

- Long-term preservation guaranteed

## Why is the ULS engaged in publishing?

- To propel Pitt research output to greater discovery on a global stage.
- To share our technology and innovation with the University community.
- To support Open Access to new scholarly content for the benefit of all.

## Do you have a role in publishing?

- Editor for a journal?
- Reviewer for a journal?
- Author of journal articles?

## Do you edit a journal?

We:

- Provide software to keep all of your journal's information in a central online location from initial submission through publication.
- Provide the Web site design, training, and ongoing support for your editorial workflow.
- Promote your journal through major indexing, abstracting and discovery services.
- Register ISSNs for all journals and Digital Object Identifiers (DOIs) for each article.
- Provide site analytics, and each article receives and displays alternative metrics.

## Do you want to move a print journal to an online environment?

## Do you need better management for your journal?

Let us know!
