To: Qaium, Ehsan <EHQ1@pitt.edu>;

Dear Ehsan,

Thank you for your interest in my research. You can use my illustrations.

Do you want the original copies in a bigger format?

I'm very interested in your results. Can you please send me a copy when finished?

Best regards,

**Jurgen de Graaff MD PhD**

**Subject:** Request to cite and re-produce published figures

---

Dr. Graaf,

My name is Ehsan Qaium, and I am a graduate student in Mechanical Engineering at the University of Pittsburgh. I am currently writing my master's thesis on the difficulty of Peripheral intravenous catheter (PIV) placement in high-risk patients. While writing the literature review portion of my thesis I came upon one of the

articles that you and your colleagues have published titled "Near-infrared light to aid peripheral intravenous cannulation in children: a randomized clinical trial of three devices." I would like to use the figures in the article for my thesis as I feel that it would help visually illustrate to the reader what the different visual vein finding devices look like. The figures will be cited and credit given to you, and your team. Please let me know if you have any questions; I look forward to hearing from you soon.

Sincerely,

Ehsan Qaium
