To: Huene, Aidan L <aidanhuene@pitt.edu>

AAAS MATERIAL:

Fig 3b from Gibbs et al., *Science*, 11 Jul 2008, Vol 321, Issue 5886, pp. 256-259, DOI: 10.1126/science.1160033

Dear Aidan Huene:

Thank you very much for your interest in the AAAS material identified in your request.

We are pleased to have you include this material in your thesis or dissertation subject to the following guidelines. These guidelines also appear on our website:

<https://www.science.org/content/page/reprints-and-permissions> under the heading 'Using AAAS material in a thesis or dissertation'.

REPRODUCING AAAS MATERIAL IN YOUR THESIS OR DISSERTATION

AAAS permits the use of content published in its journals but only provided the following criteria are met:

1. If you are using figures/tables, permission is granted for use in print and electronic versions of your dissertation or thesis.
2. A full text article may be used only in print versions of a dissertation or thesis. AAAS does not permit the reproduction of full text articles in electronic versions of theses or dissertations.
3. The following credit line must be printed along with the AAAS material: "From [Insert Full Reference Citation]/ Reprinted with permission from AAAS".
4. All required credit lines and notices must be visible any time a user accesses any part of the AAAS material and must appear on any printed copies that an authorized user might make.
5. The AAAS material may not be modified or altered except that figures and tables may be modified with permission from the author. Author permission for any such changes must be secured prior to your use.
6. AAAS must publish the full paper prior to your use of any of its text or figures.
7. If the AAAS material covered by this permission was published in *Science* during the years 1974-1994, you must also obtain permission from the author, who may grant or withhold permission, and who may or may not charge a fee if permission is granted. See original article for author's address. This condition does not apply to the news articles published in *Science*.
8. Permission covers the distribution of your dissertation or thesis on demand by a third party distributor (eg ProQuest/UMI), provided the AAAS material covered by this permission remains in situ and is not distributed by that third party outside of the context of your thesis/dissertation.
9. Permission does not apply to figures/photos/artwork or any other content or material included in your work that are credited to non-AAAS sources. If the requested material is sourced to or references non-AAAS sources, you must obtain authorization from that source as well before using that material. You agree to hold harmless and indemnify AAAS against any claims arising from your use of any content in your work that is credited to non-AAAS sources.
10. By using the AAAS Material identified in your request, you agree to abide by all the terms & conditions herein.
11. AAAS makes no representations or warranties as to the accuracy of any information contained in the AAAS material covered by this permission, including any warranties of merchantability or fitness for a particular purpose.

If how you wish to use the content falls outside of these guidelines or if you have any questions, please let me know.

Kind regards,

Liz

Subject: Requesting permission to adapt figure

[EXTERNAL EMAIL]

Hello,

I tried using the RightsLink by Copyright Clearance through the Science website to request permission to reuse a figure for my dissertation, however the form said that I needed to contact Permissions as AAAS doesn't cover all articles.

The article I tried requesting access for was Gibbs et al 2008 (<https://www.science.org/doi/abs/10.1126/science.1160033>). The Figure panel I want to reuse and slightly adapt is Figure 3B. I have also written to the author to obtain permission from them as well. I just need to figure out how to get permission from Science.

I'm not sure who else to contact regarding this issue. I hope you can point me in the right direction.

Thank you for your help,
Aidan Huene
