

# Grant-seeking Strategies to Support Engaged Scholarship in the Social Determinants of Health

Community Engaged Scholarship Forum Workshop

**March 7, 2023**

Jeremy P. Somers, PhD

Office of the Senior Vice Chancellor for Research

Lina Dostilio, EdD

Vice Chancellor of Engagement & Community Affairs

**Pitt Research**

# Social Determinants of Health (SDOH)

# Healthy People 2030

- The U.S. Department of Health and Human Services Office of Disease Prevention and Health Promotion (ODPHP), as part of their Healthy People 2030 initiative (see: <https://health.gov/healthypeople/priority-areas/social-determinants-health>), defines the Social Determinants of Health (SDOH) as factors in the environment where people are born, live, work, and play that affect health and quality of life.

# US Office of Disease Prevention and Health Promotion – Health People 2030

SDOH rests on five pillars:

1. Economic Stability
2. Education Access and Quality
3. Health Care Access and Quality
4. Neighborhood and Built Environment
5. Social and Community Context

<https://health.gov/healthypeople/priority-areas/social-determinants-health>

# Economic Stability

1. Employment
2. Food Insecurity
3. Housing Instability
4. Poverty

# Education Access & Quality

1. Early Childhood Development & Education
2. Enrollment in Higher Education
3. Graduation from High School
4. Language & Literacy

# Health Care Access & Quality

1. Access to Health Services
2. Access to Primary Care
3. Health Literacy

# Neighborhood & Built Environment

1. Access to Food That Support Healthy Dietary Patternes
2. Crime & Violence
3. Environmental Conditions
4. Quality of Housing

# Social & Community Context

1. Civic Participation
2. Discrimination
3. Incarceration
4. Social Cohesion

A recent [Grants.gov](https://www.grants.gov) search for SDOH research grant opportunities yielded 811 funding announcements from the U.S. Federal government

- 704 from National Institutes of Health (NIH). Virtually all those NIH funding opportunities were for research in the health sciences.
- Eight at the Department of Education (ED)
- Eight at the National Endowment for the Humanities (NEH)
- Other SDOH opportunities revolved around infrastructure development and support for social programs

- A recent Pivot database search for SDOH yielded 407 active research grant funding opportunities from US private foundations and non-profits.
- If US federal funding opportunities are added there are an additional 1040 listed funding opportunities.
- A more focused search for funding opportunities around “health Disparities” yield 71 opportunities from both private foundations and the US government.

# Grant-seeking Resources

- [Carnegie Library of Pittsburgh](#) – Non-profit Resource Center offers grant-writing and grant-seeking classes.  
Free access to a National Foundation Center searchable database of foundations. -

# Collaboration Resources

## Engaged Scholarship Project Development Cohort

Over four facilitated sessions, a cohort of project teams work together to refine and advance their project plans to ensure logistic feasibility, community relevance, scholarly rigor and social impact. After completing the Project Development Cohort, each project will have:

- Clearly articulated goals, including what new knowledge and/or practice the project will produce.
- List of key collaborators and project contributors.
- Understanding of the ethical challenges that may be present within the project and plans for addressing ethical challenges.
- Project logic model or theory of change.
- Articulated set of academic and public products that will best disseminate the new knowledge/practice coming from the project.

**Compensation for Community-Based Team Members:** To encourage full participation by community-based partners, we offer a stipend of \$1,200 for attending all four (4) sessions. This stipend recognizes that community-based partners are offering valuable time and expertise and that they may not be otherwise compensated for their time.

## Partnership Facilitation

The Office of Engagement & Community Affairs is your starting point for developing relationships ... that turn into collaborations ... that can turn into partnerships.

- We're a "designated listener" in community and civic conversations across the region, and facilitate partnerships and coalitions based on a shared vision of action.
- We lead, coordinate and maximize Pitt's expansive commitments in Oakland, the Hill District, Hazelwood, and Homewood.
- We're an "impact multiplier" for organizations working for stronger communities throughout the city and region, bringing to the table all the resources and capabilities of the university.
- We ensure all of Pitt's community-based engagements model ethical, contextualized, respectful, and culturally responsive behavior.

**Do not wait until the last minute...** Sometimes we are approached to help find a collaborator to meet a grant opportunity timeline. This rarely works. Engaged scholarship is about developing equitable partnerships.

**Allegheny County Overdose Prevention Coalition**

<https://www.acopc.pitt.edu/>

12/31/2016 - Present

An independent collaboration of organizations and individuals with the mission to reduce overdose deaths in Allegheny County. OverdoseFreePA.org is operated by the Pennsylvania Overdose Prevention Technical Assistance Center (TAC) and is a collaboration between the TAC, Pennsylvania communities, and six partner organizations (shown above). The TAC is based out of the Program Evaluation and Research Unit (PERU) at the University of Pittsburgh, School of Pharmacy
